Attorneys for Appellees

INTRODUCTION

As directed by the Court's September 4, 2012 Order, appellees submit this response to Appellants' Request for Judicial Notice in support of their Supplemental Brief. Appellees do not object to this Court taking judicial notice of the documents attached to counsel's declaration, but request that the Court take judicial notice of the *entire* response by the state to the ACLU's Public Records Act request, which includes the DNA Laboratory monthly statistics from January 2007. Appellees do object to the mischaracterization of the matters judicially noticed found in appellants' supplemental briefing, for the reasons detailed below.

REQUEST FOR JUDICIAL NOTICE

Pursuant to Federal Rule of Evidence 201, appellees request that the Court take judicial notice of the data contained in Exhibit 1 of the accompanying Declaration of Daniel J. Powell, which comprise true and correct copies of the Jan Bashinksi DNA Laboratory Monthly Statistics Reports from January 2007 through December 2009, as provided by the California Department of Justice to the ACLU. This data was provided to the ACLU in response to the request included as Exhibit 2 to the Declaration of Michael Risher in Support of Plaintiffs-Appellants' Motion for Judicial Notice.

1

As stated in Appellants' Request for Judicial Notice, under Federal Rule of Evidence 201(d), judicial notice may be taken by a court of appeal during the pendency of an appeal. Moreover, the monthly reports included in Exhibit 1 are official documents of the government and are thus the proper subject of judicial notice. *Sinaloa Lake Owners Ass'n v. City of Simi Valley*, 864 F.2d 1475. 1479–80 n.2 (9th Cir. 1989). These documents are relevant to appellees' argument that collecting forensic DNA samples at the time of arrest increased the efficacy of California's DNA Data Bank.

ARGUMENT

Despite appellants' best efforts at obfuscation, the data speaks for itself: the number of hits to California's DNA Data Bank have more than *doubled* since Prop. 69 fully went into effect in 2009.[1] The law has proven itself a

---

[1] While the data show that California's DNA Act is effective in helping law enforcement officials solve crime, evidence that the DNA Act is demonstrably effective is not necessary to uphold the law. *See Michigan Dept. of State Police v. Sitz*, 496 U.S. 444, 453–55 (1990) (rejecting the extensive "effectiveness" review conducted by the Michigan court in evaluating sobriety checkpoints and in any event finding 1.5 percent success rate was sufficient to justify the checkpoint intrusion on all drivers); *Bell v. Wolfish*, 441 U.S. 520, 532, 548-549 (1979) (upholding body cavity searches of pre-trial detainees although petitioners proved only "one instance" where contraband was found during such search); *Whalen v. Roe*, 429 U.S. 589, 597-598 (1977) ("Nothing in the Constitution prohibits a State from

(continued…)

2

valuable tool for law enforcement. In 2008, the average hit rate per month

was 183; jumping to 278 in 2009, the first year Proposition 69 went into

effect, and steadily increasing to 361 in 2010, and to an average of over 425

hits per month from January through July 2011. The only significant change

that occurred after January 1, 2009 during that time was that California

began collecting DNA forensic identification samples from arrestees.

Any doubt that this increased effectiveness is due to the collection of

arrestee samples is put to rest by examining what occurred after the

California Court of Appeal issued its decision in *People v. Buza*, 129 Cal.

Rptr. 3d 753, in August 2011. The number of profiles uploaded to CODIS

plummeted from 17,966 in July 2011 to 7,947 samples in December 2011 as

law enforcement officials reacted to the ruling concluding that California's

Prop. 69 was unconstitutional.[2] Not surprisingly, the number of hits to

California's Data Bank also plummeted, dropping to a low of 215, a number

not seen since February 2009, right after Proposition 69 fully went into

_____

(…continued)

reaching ... a conclusion and acting on it legislatively simply because there is
no conclusive evidence or empirical data")

[2] The number of profiles uploaded to CODIS has rebounded
somewhat in response to the California Supreme Court's decision to review
Buza, 262 P.2d 854 (2011), but it has not yet fully reached pre-*Buza* levels.

effect. In May 2012, after collections returned to pre-*Buza* levels, there were

490 hits.

To summarize: before Prop. 69 went into effect, the average monthly

hit rate was 183. Today the monthly average for 2012 stands at over 400

hits per month. When some local law enforcement agencies ceased

collecting arrestee profiles in 2011 in response to *Buza*, the hit rate dropped

to 215. The relationship between collecting arrestee samples and the

increased hit rate is clear.

Citing a RAND Report: Toward a Comparison of DNA Profiling and

Databases in the United States and England (2010)[3], appellants suggest that

---

[3]The RAND Report contains many deficiencies and errors that call its
conclusions in to question, as indicated in appellees' Rule 28(j) letter filed
on Feb. 28, 2011 (Docket No. 41). Among other things, the RAND Report
has been criticized by a national group of crime lab directors for its limited
data, its methods, its premises and its conclusions. Vallone, J., *DNA
Analysis Can Do Better Solving U.S. Crimes: Rand*, Investor's Business
Daily Posted (Apr. 29, 2011), http://news.investors.com/Article/570604/
201104291554/LAPD-Chief-Others-Say-US-DNA-Analysis-Can-
Improve.htm (noting Rand Study and criticism by American Society of
Crime Lab Directors: "ASCLD members have serious questions about the
Rand Study, including its limited data, its methods, premises, and
conclusions as well as Rand's limited understanding of state databases and
the U.K. system. . . .") In addition, RAND itself admits the Report was
based on limited data and "preliminary comparisons." Rand Report at 2.
RAND likewise admits, "there are differences between the U.S. and English
databases that preclude straightforward comparison. *Id*. at 13. Some of

(continued…)

4

this increase is due to an increase in crime scene profiles (e.g., forensic

unknowns) rather than arrestee samples. Appellants, however, make this

leap by comparing the number of new offender profiles uploaded each

month[4] to the total increase in forensic unknown samples over the past two

years. This comparison is inapt. The telling comparison is between the *total*

_____

(…continued)
RAND's misstatements of law undercut RAND's most basic comparisons.
For example, RAND's comparison of Florida's and California's DNA
database programs based upon what RAND believes are allegedly identical
laws, misstates the law from both states with respect to DNA collection from
arrestees. *Compare, e.g.*, RAND Report at 19-20 ("Florida's database
policies became basically the same as California's after [Florida] enacted an
all-felony arrestees provision *in mid-2009*") *with* Fla. Stat. § 943.325 (2010)
(DNA collection from felony arrestees does not begin until January 2011,
and is phased in by offense from 2011 through 2019); *compare also* RAND
Report at 18 ("With the passage of Proposition 69, California created one of
the most inclusive DNA database in the country, *encompassing all felony
arrestees, including juveniles, and convicted sex-offense misdemeanants*)
(emphasis added) with Cal. Penal Code, § 296(a)(2)(C) & (3) (specifying
that California's 2009 collection from arrestees includes only adults (*not
juveniles*) arrested or charged with a felony offense, *and all persons who are
required to register as a sex or arson offender for a misdemeanor or felony
crime* (i.e., not all persons who are convicted of a misdemeanor sex offense).
    [4] As indicated above, because of the significant decrease in the
number of offender samples, which decrease is attributable to law
enforcement's response to the Court of Appeal's decision in *Buza*, the
number of offender samples added since October 2011 has been abnormally
low.

increase in offender profiles—which have increased by 30 percent[5]—and the

total increase in crime scene profiles—which have increased by 61 percent.

This direct comparison demonstrates that an increase in both offender

samples *and* crime scene samples have contributed to the greater hit rate.

That is not surprising; in order to have a match, both the offender and crime

scene sample must be in the database. The Fourth Amendment does not

require the state to prefer one kind of data over the other.

Appellants' argument and the RAND study are based on the premise

that if the state were not spending resources on developing DNA Profiles

from arrestee samples, it would instead devote those resources to processing

crime scene profiles. Appellants' Supplemental Brief at 17 ("Spending

resources on arrestee testing means that less time and money are available to

test crime-scene evidence and convicted-offender samples in a timely

manner.") First, this premise is demonstrably false. The funds for

processing of arrestee samples do not come from the state's General Fund,

but rather from a dedicated fund created by Prop. 69 that cannot be used for

any other purpose. Cal. Gov't. Code, § 76104.6(a) (increasing criminal fines

---

[5] This number can be obtained for any given year by subtracting the
Total Forensic Unknown Profiles in CODIS from the Total Data Bank
Profiles in CODIS.

by ten percent and devoting those funds to adding the additional

infrastructure to test the additional samples and to local law enforcement to

collect arrestee samples). Second, as the district court recognized, there is

no evidence that the collection of forensic DNA samples from felony

arrestees had a negative impact on the databank's effectiveness. ER 18. Nor

is it likely that such evidence exists, in light of the fact that the hit rate has

doubled since Prop. 69 went into effect. Third, additional resources would

not assist state officials in analyzing crime scene samples because *there is no*

backlog of crime scene samples in any of the state's labs. Rosalio Ahumada,

Crime Labs Catch Up on DNA Backlog, Modesto Bee (January 26, 2012).

In any event, it is up to the state, not appellants, RAND, or this Court, to

determine how to allocate its resources. *Michigan Dept. of Police v. Sitz*,

496 U.S. 444, 453 (1990). And in doubling the hit rate of its Data Bank,

California officials have shown that they struck the right balance between

collecting arrestee samples and analyzing crime scene samples.

CONCLUSION

Appellees do not object to Appellants' Request for Judicial Notice, but

urge this court to consider all of the data submitted to the ACLU in response

to its public records act request, and to reject appellants' mischaracterization

of that data.

Dated: September 10, 2012   Respectfully Submitted,

DECLARATION OF DANIEL J. POWELL

I, Daniel J. Powell, declare as follows:

1.   I am counsel of record for appellants in this case. I submit this declaration in support of Appellees' Response to Appellants' Request for Judicial Notice; Supplemental Request for Judicial Notice. I have personal knowledge of the matters set forth below, and if called to testify, could and would competently testify thereto.

2.   Attached as Exhibit A are true and correct copies of the Jan Bashinksi DNA Laboratory Monthly Statistics from January 2007 to March 2012. These reports were provided to Mr. Risher, counsel for appellants', in response to a Public Records Act request he filed with Attorney General's Office. A copy of the letter accompanying these records can be found in Exhibit 2 to Appellants' Motion for Judicial Notice.

I declare under the penalty of perjury that the foregoing is true and correct. Executed this 10th day of September, 2012, in San Francisco California

                                        s/ Daniel J. Powell

CERTIFICATE OF SERVICE

Case Name: **Elizabeth Aida Haskell, et al. v.**   No.   **10-15152**
            Kamala Harris, et al.

I hereby certify that on <u>September 10, 2012</u>, I electronically filed the following documents with the Clerk of the Court by using the CM/ECF system:

APPELLEES' RESPONSE TO APPELLANTS' REQUEST FOR JUDICIAL NOTICE; SUPPLEMENTAL REQUEST FOR JUDICIAL NOTICE AND SUPPORTING DECLARATION OF DANIEL J. POWELL

I certify that **all** participants in the case are registered CM/ECF users and that service will be accomplished by the CM/ECF system.

I declare under penalty of perjury under the laws of the State of California the foregoing is true and correct and that this declaration was executed on <u>September 10, 2012</u>, at San Francisco, California.
